

CHINMAYEE SURWADE

Business Analyst | Data Analyst | Trade Finance & Banking Systems
Chennai, India | +91 93630 99166 | chinmayee.surwade@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Business Analyst and Data Analyst with 4+ years across banking operations and independent data consulting. Two years at Bank of America Continuum India (BACI) delivering trade finance systems, achieving a 30% reduction in UAT defects and a 99% on-time batch completion rate across 6 applications. Since June 2024, running an independent consulting practice across 5 client engagements in fintech, healthcare, wellness, and operations, alongside AI projects including a deployed RAG assistant and a multi-agent job search system. Proficient in SQL, Python, Power BI, and Java, with working experience in AI agent development and prompt engineering applied to requirements analysis and reporting. Immediate joiner.

CORE SKILLS

Business Analysis: Requirements Gathering, Stakeholder Management, BRD, FRD, SRS, User Stories, Acceptance Criteria, UAT Coordination, Gap Analysis, Process Mapping (BPMN), Use Cases, Data Flow Diagrams

Data & Analytics: SQL, Python, Java, Power BI, Tableau, Advanced Excel, BI & KPI Reporting, Data Validation

Banking & Systems: Trade Finance, Letters of Credit, Documentary Collections, Open Account, LoanIQ, MQ Messaging, Transaction Processing

Databases & Data Engineering: SQL Server, Oracle, Data Warehousing, ETL/ELT Concepts

Tools & Methods: Jira, Azure DevOps, Confluence, MS Visio, Lucidchart, Agile (Scrum/Kanban), Waterfall, SDLC, ITIL Basics

AI & Automation: AI Agent Development (Multi-Agent Systems, Relevance AI, n8n), Prompt Engineering (Iterative/Looping, Chain-of-Thought), RAG, AI-Augmented BA Workflows

PROFESSIONAL EXPERIENCE

Independent Consultant, Business & Data Analytics	<i>Jun 2024 - Present</i>
Delivering end-to-end business analysis and data analytics solutions for clients across fintech, healthcare, wellness, and operations, turning operational and financial data into business recommendations.	
Healthcare Data Client	<i>Jul - Sep 2026</i>
Built automated data-quality checks across approximately 250,000 records per batch, flagging a 2% exception rate and cutting review turnaround time from 6 hours to 2.5 hours per file.	
ReferMe Investments	<i>Feb - Jun 2026</i>
Designed an investment analytics framework with 25+ KPIs and a multi-dimensional scoring model covering financial strength, operational performance, growth, customer health, and risk, with Power BI dashboards built around the underwriting methodology.	
Infinity Fitness Studios	<i>Dec 2025 - Feb 2026</i>
Built Power BI retention and utilization dashboards and identified a 3-month attrition pattern through data segmentation, directly informing pricing and operational decisions.	
The GlamSquad Salon	<i>May - Aug 2025</i>
Diagnosed root causes of declining profitability through staffing, pricing, and customer feedback analysis, recommending adjustments that delivered a 15% profit increase.	
Maintenance Operations Client	<i>Aug - Nov 2024</i>
Cleansed and structured approximately 10,000 records across 20 teams into a Power BI dashboard surfacing a 92% completion rate, eliminating 3 to 4 hours of weekly manual reporting.	
Analyst, Trade Finance & BAU, Bank of America Continuum India (BACI), Chennai	<i>Jun 2022 - Jun 2024</i>
Tradeline-LoanIQ Integration	
- Served as primary Business Analyst enabling real-time commitment utilization reporting via MQ messaging, eliminating end-of-day batch latency for credit monitoring teams. - Gathered functional requirements for Letter of Credit, Documentary Collections, and Open Account flows, translating them into 15+ user stories with acceptance criteria for a 6-member development team. - Coordinated across 4 cross-functional teams (development, QA, operations, risk) to validate transaction flow accuracy, reducing UAT defects by 30%.	

- Executed unit, integration, and volume testing on high-throughput financial transaction pipelines to ensure data accuracy.

BAU (Business As Usual) Operations

- Monitored nightly test batch execution across 6 critical applications, sustaining a 99% on-time completion rate through consistent monitoring and same-day anomaly resolution.
- Authored and presented monthly capacity and performance reports to stakeholders, tracking KPIs and surfacing trends for process improvement.
- Led UAT activities with stakeholders, defining test scenarios and validating system behavior prior to release.
- Led knowledge-transfer sessions on trade finance processes and LoanIQ for 2 junior analysts, helping them ramp up to work independently.

Data Analyst Intern, Siemens, Pune

May 2021 - Oct 2021

- Analyzed operational datasets in Excel to surface performance trends, delivering structured KPI dashboards that reduced manual reporting time by approximately 40%.
- Executed data cleaning and transformation across multiple operational tables, improving data consistency for downstream decision-making.

Software Development Intern, DevLogic Technologies, Pune

Oct 2019 - May 2020

- Built backend modules for a web application using Java and SQL, handling data processing and user management, deployed within an Agile sprint environment.

KEY PROJECTS

All projects documented with code and findings on GitHub: github.com/chinmayeesurwade

CareerIQ AI: Multi-Agent Job Search & Interview Intelligence System

2026

- Built a multi-agent AI system (Relevance AI, n8n) applying prompt engineering (iterative looping, chain-of-thought) to automate JD screening, resume tailoring, and recruiter outreach.

WTO Trade Intelligence Assistant

Jul 2026

- Built and deployed a RAG-based trade intelligence assistant (Gemini, ChromaDB) with embedding-based semantic search and a Streamlit interface for real-time querying.

E-Commerce Revenue Optimization Case Study

Apr - Jun 2026

- Diagnosed a marketplace stuck at 0 to 2% month-over-month growth through funnel, cohort, and RFM analysis (SQL, Excel, Power BI), identifying a 35% checkout drop-off and building an A/B-tested roadmap projected to lift revenue 12 to 18%.

Real-Time Data Pipeline & Customer Churn Analysis

2024 - 2025

- Engineered an end-to-end streaming transaction pipeline (Python, Kafka-style simulation, SQL Server) and built a churn prediction model (scikit-learn) on a 50,000+ row telecom dataset, achieving up to 80% accuracy.

EDUCATION

B.Tech, Information Technology: MKSSS's Cummins College of Engineering for Women, 2022

CERTIFICATIONS & LEARNING

- Data Visualisation: Empowering Business with Effective Insights, TATA (Forage), Apr 2026
- Data Analytics Job Simulation, Deloitte Australia (Forage), Apr 2025
- Fundamentals of Predictive Project Management, Project Management Institute, 2026
